Tempus Enters Multi-Year Strategic Collaboration With Boehringer Ingelheim to Advance Its Cancer Pipeline

May 14, 2025

CHICAGO--(BUSINESS WIRE)--May 14, 2025-- Tempus AI, Inc. (NASDAQ: TEM), a technology company leading the adoption of AI to advance precision medicine and patient care, today announced a new strategic collaboration to advance Boehringer Ingelheim's growing cancer pipeline. The new, multi-year collaboration builds on foundational work the two companies have conducted in the last few years, leveraging data and AI to further advance therapeutic research and development.

Despite significant breakthroughs in the understanding, prevention, and treatment of cancer, the disease remains a major challenge, impacting millions of lives and straining healthcare systems. Boehringer Ingelheim is committed to changing this by advancing the discovery and development of new breakthrough treatments for people living with hard-to-treat cancers. With this new collaboration, Boehringer will have access to Tempus' de-identified database containing molecular, clinical, and imaging data and its analytical platform, Lens. The aim is to explore data derived from patient cohorts to guide biomarker development and patient stratification, develop drug combination hypotheses, support novel target discovery efforts, and educate on patients' healthcare journey.

"By combining internal, pre-clinical experimental data, with real-world data from Tempus on its AI-powered platform, we can profoundly deepen our understanding of cancer biology and accelerate our drug discovery and development efforts," said Mark Paul Petronczki, Head of Oncology Research at Boehringer Ingelheim.

"Leveraging real-world patient data is crucial for strengthening our data foundation and harnessing advanced AI methodologies, ultimately accelerating drug development. Integrating these comprehensive datasets with our internal data and techniques not only drives innovation but also enhances the precision and efficiency of pharmaceutical research, paving the way for groundbreaking medical advancements. I am very excited to continue our collaboration with Tempus," stated Jan Nygaard Jensen, Head of Computational Innovation at Boehringer Ingelheim.

"We look forward to expanding our work with the Boehringer team and the opportunity to deploy multiple of our solutions to their growing oncology pipeline," said Ryan Fukushima, Chief Operating Officer at Tempus. "We both are firmly committed to applying the power of data and AI to this important research to bring novel treatments to patients faster."

About Tempus

Tempus is a technology company advancing precision medicine through the practical application of artificial intelligence in healthcare. With one of the world's largest libraries of multimodal data, and an operating system to make that data accessible and useful, Tempus provides AI-enabled precision medicine solutions to physicians to deliver personalized patient care and in parallel facilitates discovery, development and delivery of optimal therapeutics. The goal is for each patient to benefit from the treatment of others who came before by providing physicians with tools that learn as the company gathers more data. Forward Looking Statements

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended, about Tempus and Tempus' industry that involve substantial risks and uncertainties. All statements other than statements of historical facts contained in this press release are forward-looking statements, including, but not limited to, statements regarding the expected outcomes and benefits of the collaboration with Boehringer Ingelheim in applying real-world data to advance therapeutic research and development, are forward-looking statements. In some cases, you can identify forward-looking statements because they contain words such as "anticipate," "believe," "contemplate," "continue," "could," "estimate," "expect," "going to," "intend," "may," "plan," "potential," "predict," "project," "should," "target," "will," or "would" or the negative of these words or other similar terms or expressions. Tempus cautions you that the foregoing may not include all of the forward-looking statements made in this press release.

You should not rely on forward-looking statements as predictions of future events. Tempus has based the forward-looking statements contained in this press release primarily on its current expectations and projections about future events and trends that it believes may affect Tempus' business, financial condition, results of operations and prospects. These forward-looking statements are subject to risks and uncertainties related to: Tempus' financial performance; the ability to attract and retain customers and partners; managing Tempus' growth and future expenses; competition and new market entrants; compliance with new laws, regulations and executive actions, including any evolving regulations in the artificial intelligence space; the ability to maintain, protect and enhance Tempus' intellectual property; the ability to attract and retain qualified team members and key personnel; the ability to repay or refinance outstanding debt, or to access additional financing; future acquisitions, divestitures or investments; the potential adverse impact of climate change, natural disasters, health epidemics, macroeconomic conditions, and war or other armed conflict, as well as risks, uncertainties, and other factors described in the section titled "Risk Factors" in Tempus' Quarterly Report on Form 10-Q for the fiscal quarter ended February 24, 2025 filed with the Securities and Exchange Commission ("SEC") as well as in other filings Tempus may make with the SEC in the future. In addition, any forward-looking statements contained in this press release are based on assumptions that Tempus believes to be reasonable as of this date. Tempus undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date of this press release or to reflect new information or the occurrence of unanticipated events, except as required by law.
