Tempus and NYU Langone Health Announce Strategic Collaboration to Advance Precision Oncology

January 12, 2026

CHICAGO--(BUSINESS WIRE)--Jan. 12, 2026-- Tempus, a leader in artificial intelligence and precision medicine, and NYU Langone Health, one of the nation's premier academic medical centers, today announced a multi-year strategic collaboration aimed at transforming cancer care through advanced molecular profiling and data-driven insights. The collaboration will support NYU Langone Health's Center for Molecular Oncology at the Laura and Isaac Perlmutter Cancer Center, a comprehensive, pan-cancer initiative to more deeply understand disease biology over time.

The research seeks to enhance genomic diagnostics to improve patient outcomes, inform future clinical practice, and accelerate the development and validation of novel assays and algorithmic diagnostics. As part of this work, the two organizations are launching a prospective observational study titled, "Serial Molecular Profiling and Monitoring of Human Cancer," in which patients enrolled in the study will be sequenced throughout their treatment journey in an effort to collect the longitudinal data critical to this research. The collaboration, which evolved independently from Tempus' relationship as a trusted provider of NGS testing services, also includes a series of subsequent studies focused on assay validation, biomarker discovery, biological modeling, real-world data analysis, and the development of AI-powered predictive algorithms.

"Through the integration of advanced genomic technologies and data science, we are deepening our understanding of cancer's complexity and pioneering transformative approaches for patient monitoring and treatment," said Ezra Cohen, MD, Chief Medical Officer, Oncology at Tempus. "Our research is focused on generating actionable insights through better understanding of cancer response, resistance, and trajectory that will not only refine and enhance current assays, but also drive the creation of innovative diagnostic tools and algorithms that can empower clinicians to deliver truly individualized care to their patients."

"This strategic collaboration will further our ability to analyze cutting-edge serial molecular profiling technology in the routine care of patients at the Perlmutter Cancer Center at NYU Langone Health," said Shridar Ganesan, MD, PhD, Director of the Center for Molecular Oncology at Perlmutter Cancer Center. "This approach will enable us to better understand the biology of individual cancers, inform our ability to implement and develop targeted therapies, and assess response and emerging resistance."

About Tempus

Tempus is a technology company advancing precision medicine through the practical application of artificial intelligence in healthcare. With one of the world's largest libraries of multimodal data, and an operating system to make that data accessible and useful, Tempus provides AI-enabled precision medicine solutions to physicians to deliver personalized patient care and in parallel facilitates discovery, development and delivery of optimal therapeutics. The goal is for each patient to benefit from the treatment of others who came before by providing physicians with tools that learn as the company gathers more data. Forward Looking Statements

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended, about Tempus and Tempus' industry that involve substantial risks and uncertainties. All statements other than statements of historical facts contained in this press release are forward-looking statements, including, but not limited to, statements regarding the expected outcomes and benefits of the collaboration with NYU Langone Health to use genomic testing and AI to advance clinical research, assay validation, biomarker discovery, real-world data analysis, and the development of AI-powered predictive algorithms. In some cases, you can identify forward-looking statements because they contain words such as "anticipate," "believe," "contemplate," "continue," "could," "estimate," "expect," "going to," "intend," "may," "plan," "potential," "predict," "project," "should," "target," "will," or "would" or the negative of these words or other similar terms or expressions. Tempus cautions you that the foregoing may not include all of the forward-looking statements made in this press release.

You should not rely on forward-looking statements as predictions of future events. Tempus has based the forward-looking statements contained in this press release primarily on its current expectations and projections about future events and trends that it believes may affect Tempus' business, financial condition, results of operations and prospects. These forward-looking statements are subject to risks and uncertainties related to: Tempus' financial performance; the ability to attract and retain customers and partners; managing Tempus' growth and future expenses; competition and new market entrants; compliance with new laws, regulations and executive actions, including any evolving regulations in the artificial intelligence space; the ability to maintain, protect and enhance Tempus' intellectual property; the ability to attract and retain qualified team members and key personnel; the ability to repay or refinance outstanding debt, or to access additional financing; future acquisitions, divestitures or investments; the potential adverse impact of climate change, natural disasters, health epidemics, macroeconomic conditions, and war or other armed conflict, as well as risks, uncertainties, and other factors described in the section titled "Risk Factors" in Tempus' Quarterly Report on Form 10-K for the fiscal year ended December 31, 2024 filed with the Securities and Exchange Commission ("SEC") as well as in other filings Tempus may make with the SEC in the future. In addition, any forward-looking statements contained in this press release are based on assumptions that Tempus believes to be reasonable as of this date. Tempus undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date of this press release or to reflect new information or the occurrence of unanticipated events, except as required by law.
